

**Model, analyze, and visualize vehicle swept paths from a 3D perspective**  
*Transoft Solutions to host a public online event previewing the latest, cutting-edge 3D technology*

**FOR IMMEDIATE RELEASE**  
**May 6, 2011 – Vancouver, BC, Canada**

Transoft Solutions Inc., developers of industry-leading software will be conducting a series of live online launch events on May 11th and 12<sup>th</sup>, 2011 for AutoTURN Pro 3D, the latest addition to the AutoTURN family of software. Featuring patent-pending technology, AutoTURN Pro 3D represents the next evolution for modeling, analyzing, and visualizing vehicle simulations. The upcoming CAD software release goes beyond 2D checking and enters the arena of true 3D design and analysis.

Transoft Solutions will be hosting these free public demo presentations for AutoTURN Pro 3D on May 11th (10 am PDT / 1 pm EDT) and May 12<sup>th</sup> (8 am PDT / 11 am EDT), 2011. To register for either of the scheduled events, visit <http://www.transoftsolutions.com/webinar>.

“With this being Transoft Solutions 20th anniversary, it just seemed fitting that we release the next ‘big thing’ in the software category that we pioneered in 1991,” says Noel Dolotallas, Vice President of Marketing & Sales at Transoft. “Back then, AutoTURN revolutionized the way engineers and designers evaluated vehicle swept paths and now, with the Pro version they can analyze projects from a whole new perspective and deeper insights. Today you see more and more designers moving towards 3D software so timing-wise it made sense – we want to make sure that our customers are equipped with a solution that not only meets their needs and expectations, but ultimately helps them stay ahead in this increasingly competitive market where there’s no such thing as a ‘small’ advantage.”

**About Transoft Solutions**

Established in 1991, Transoft Solutions Inc. develops the most thoroughly researched and innovative CAD software for the engineering community. Transoft Solutions suite of productivity enhancing software have become the trusted de-facto standard for over 90% of the Top 100 ENR AEC firms, 85% of North American departments of transportation, and regulatory agencies.
