

## Transoft Solutions and InfraCAD Share Center Stage at the Dubai Airport Show

### FOR IMMEDIATE RELEASE

May 1, 2014 – Vancouver, BC, Canada

Transoft Solutions, developers of CAD-based aviation design software and Transoft partner InfraCAD Solutions, a leading technology provider to the Civil and Infrastructure sectors in the Middle East region, announce a shared booth presence at the Dubai Airport Show, May 11-13, 2014. The show is a leading event exclusively dedicated to airport construction, operations and technology.

At their booth, Transoft and InfraCAD will showcase their full line of industry-leading engineering design software, including solutions developed by recently acquired Simtra AeroTech of Sweden. Clients across the Middle East region use PathPlanner and AeroTURN Pro 3D— powerful, yet user-friendly CAD software for airside design. In addition, clients can benefit from using Obstacle Surface Planner and Aircraft Data Viewer for planning safe and efficient operations.

“With all the expansion taking place across the region, we’re pleased to attend the Dubai Airport Show with a broad spectrum of aviation planning software to help airports and airport planners handle the increasing passenger numbers,” said Gordon Reid, Director of InfraCAD Solutions, a key Transoft software partner. “We’re looking forward to demonstrating our full range of solutions to a market segment with extensive acquisitions and infrastructure needs in the near future.”

“The Dubai Airport Show represents the first time we have come to the Middle East region under one unified banner and we’re pleased to showcase both of our technologies,” said Transoft’s Vice President of Aviation, Ben van Leest. “It’s a unique opportunity to attend the show when airports and airlines in this region are expanding in such an impressive fashion.”

Transoft Solutions and InfraCAD look forward to welcoming everyone to their booth for client feedback along with live demonstrations of AeroTURN Pro3D and PathPlanner software and other related software solutions for the aviation industry.

#### About InfraCAD Solutions

InfraCAD Solutions focuses on high quality technology and related services to the Civil / Infrastructure sectors throughout the Middle East. Agreements are in place with leading international software developers for this purpose, enabling the Company to deliver specialist civil and infrastructure design software for Airports, Roads, Drainage, Bridges and Visualization. As part of the overall services provided to clients, they also offer a Professional Support Service facility to Consultants, Government organizations, Private Property Developers and Infrastructure Contractors, centered around Transportation Planning and Geometric Design. For more information, please visit [www.infracad.com](http://www.infracad.com)

#### About Transoft Solutions

Established in 1991, Transoft Solutions Inc. develops the most thoroughly researched and innovative CAD software for the transportation engineering community. Transoft Solutions’ suite of productivity enhancing software have become the trusted de-facto standard for over 90% of the Top 100 AEC firms (ENR), 85% of North American departments of transportation, and numerous global regulatory agencies. Providing design solutions for roads and highways, airports, light rail transit, and highway signs—we give transportation professionals the tools they need to design with confidence.
