

Transoft Solutions Free Training Sessions an Overwhelming Success

Vast interest in building proficiency with AutoTURN, ParkCAD, and GuidSIGN required extra sessions, received high marks for presentation

FOR IMMEDIATE RELEASE

January 26, 2010 – Vancouver, BC, Canada

Transoft Solutions, developers of the industry leading software for the engineering and architectural communities worldwide, reports that the recent series of free web-based training sessions, conducted January 4th – 8th, 2010, were a great success. The vast interest in the Transoft Solutions' software specific training sessions required additional sessions in order to accommodate the registration requests.

"Our goal with our training sessions is very straight forward, we want to make sure that the learners walk away knowing that they can better use their software to conquer difficult design challenges," said William Yeung, Product Specialist. "The sessions were a hit with everyone who participated and it was exciting to help so many people get more out of their software."

An open call for registration to the free training sessions was sent out in December 2009 as a thank you for the support Transoft Solutions received in through the year. Initially, one [Essentials Training](#) session was scheduled for those interested in learning how to build their proficiency for [AutoTURN](#), [ParkCAD](#), and [GuidSIGN](#). Within hours of the notification, the initial sessions were full and a large number of registration requests were received prompting a second round of sessions.

Those that were able to secure a spot received instruction through one of Transoft Solutions more popular training options. Learners worked through exercises with Mr. Yeung as he showed how apply program settings and functions on their own workstations, and in a CAD environment. As an added bonus, Mr. Yeung previewed [Advanced Training](#) as well as some of the new features being implemented into upcoming versions of Transoft Solutions software.

Reaction by the attendees to the training sessions has been overwhelmingly positive. Questionnaires received made note of the usefulness of the course materials, the high quality of presentation by Mr. Yeung, and the ease of learning. In response to the caliber of training they received, many of the people who attended have registered for future paid Advance Training sessions.

Further information about the Transoft Solutions software training options, including how to register, course objectives, and benefits, is available at www.transoftsolutions.com/Trainings.aspx or by calling 1.888.244.8387 (toll free in Canada and the US).

About Transoft Solutions

Established in 1991, [Transoft Solutions Inc.](#) develops the most thoroughly researched and innovative CAD-based software for the engineering and architectural design communities. As an Autodesk Developer Network Professional and Bentley Developer Network Commercial member, [Transoft Solutions](#) continues to deliver software second to none. Known as a world-wide industry leader, Transoft Solutions suite of productivity enhancing solutions have become the trusted de-facto standard for over 90% of the Top 100 ENR AEC firms, 85% of North American departments of transportation, and regulatory agencies including AASHTO.
