

Transoft Solutions Expands its Training Programs with the Launch of Live Web-based Training

New Web-Based Training Allows New Transoft Solutions Users to Have All of the Benefits of Instructor Led Class Room Training at Their Workstations.

FOR IMMEDIATE RELEASE

July 6, 2009 – Vancouver, BC, Canada

Transoft Solutions, developers of industry leading software for the engineering and architectural communities, announces the launch of live web-based training for the AutoTURN, AeroTURN Pro, GuidSIGN, ParkCAD, and TORUS software applications. Registration information and schedule for the instructor led classes are now available at www.transoftsolutions.com/webtraining.aspx.

"A live web-based training program has been long requested by users in consulting firms and departments of transportation for sometime," said Vice-President of Marketing and Sales, Noel Dolotallas. "We are excited to deliver a cost effective training solution that quickly gives designers an understanding of the full functionality of our software so that they can achieve maximum designing productivity on a minimized learning curve."

Developed as a synthesis of desktop training and on-site class based training, these new training courses are taught in a live, interactive, online learning environment. The new web-based training offers users the unique ability to learn and engage in a hands-on exercise while using their own workstations. The interactive environment provides participants with the ability to pose and have questions answered in real-time. Additionally, once the training session begins, accompanying training PDF documents will be presented for download for reference during and after the session.

The new training sessions, led by Product Specialist, William Yeung, are broken down into Essentials and Advanced courses. Both courses are focused on elevating the skill levels of all users of Transoft Solutions products by focusing on the depth and usability of the software. Designers interested in registering for both the Essentials and the Advanced training sessions will receive an added bonus of a 10% price discount.

Users interested in registering for web-based training should note that a broadband internet connection and the most current versions of AutoTURN, AeroTURN Pro, GuidSIGN, ParkCAD, or TORUS are required.

For further information about Transoft Solutions' training products and services, our suite of productivity enhancing tools, training solutions, or to download free software demos or sign up for web-based demonstrations, visit www.transoftsolutions.com.

About Transoft Solutions

Established in 1991, Transoft Solutions Inc. develops the most thoroughly researched and innovative CAD-based software for the engineering and architectural design communities. As an Autodesk Developer Network Professional and Bentley Developer Network Commercial member Transoft Solutions continues to deliver software second to none. Known as a world-wide industry leader, Transoft Solutions suite of productivity enhancing solutions have become the trusted de-facto standard for over 90% of the Top 100 ENR AEC firms, 85% of North American departments of transportation, and regulatory agencies including AASHTO.
